Foreword

This 30th edition of **Voluntary Support of Education** records a new high point in private giving to U.S. colleges and universities. The rise in voluntary support of higher education looks particularly impressive when measured against the previous year's drop (individual donors were hard hit in 1987 by new tax provisions and a shake-up on Wall Street). This year's apparent rebound will surely provoke debate over the impact of tax policies and fluctuating financial markets on charitable contributions.

But what is equally worthy of note is how, despite a slowing economy and mixed corporate profits, the 1988-89 increase extends a long-range pattern of growth in voluntary support. Individual Americans and a variety of American institutions seem willing to sustain their traditional support of education at a steadily rising rate.

With competition for the voluntary support dollar increasing, educational institutions will likely feel the need to sharpen their appeals, and private donors (both institutional and individual) will need to clarify their priorities. Although the Council predicts continuing growth overall in education support, we also anticipate some fluctuation in the shares of support given and received by different sectors of donors and recipient institutions. The next few years of education support should be very interesting to track.

We would like to take this opportunity to thank our survey cosponsors, the Council for Advancement and Support of Education and the National Association of Independent Schools. And most of all, we want to thank the college and school officials who took time from their busy schedules to participate in this important survey.

COUNCIL FOR AID TO EDUCATION

July 1990

Voluntary Support of Education is published annually by the Council for Aid to Education, Inc. Additional copies are available for $50 each *prepaid* from the Council at 51 Madison Avenue, New York, NY 10010 (212/689-2400).

The Sponsoring Organizations

The Council for Aid to Education, Inc. is a not-for-profit corporation dedicated to promoting an effective partnership between business and education in the task of improving America's educational system. Based in New York City and funded by contributions from business, the Council works directly with business to target key areas of educational concern, identify opportunities for corporate involvement in education, and provide detailed advice on how to conduct effective programs in support of education. The Council's activities include research, consulting, publicating, and conducting workshops and seminars.

The Council for Advancement and Support of Education (CASE) is a professional educational association with 2,850 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fundraisers, alumni administrators, communicators, government relations officers, and the managers of these functions in postsecondary and secondary institutions. CASE is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 355,000 students. Its administrative and academic services to member schools include research reports, periodicals, and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators, and school trustees.

Colleges and Universities

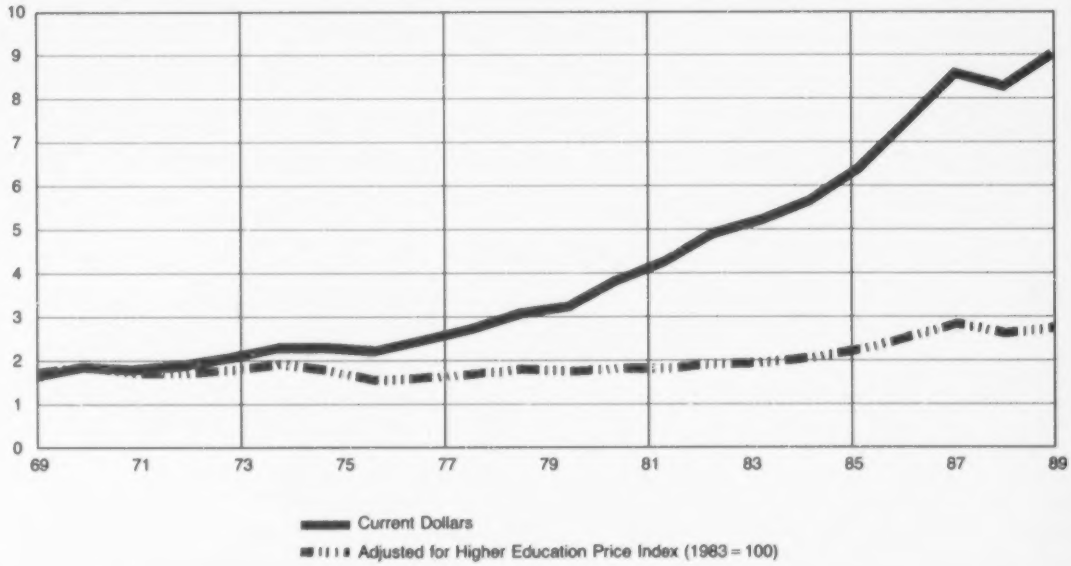
National Estimates

Private contributions to American colleges and universities rose to an estimated $8.9 billion in the 1989 academic year, surpassing a 1987 benchmark ($8.5 billion) to reach the highest level on record. Concerns about a downward trend in voluntary support for higher education had been stimulated by an unusual drop of 3.5 percent in 1987-88, but last year individual giving appears to have rebounded from the effects of new tax provisions and turmoil on Wall Street, and combined with increases in support from all other sources to make a very strong showing.

The 1989 increase in voluntary support amounted to 8.8 percent, outpacing the year's 4.7 percent cost-of-living increase (measured by the Consumer Price Index), as contributions to higher education have since 1982. Since 1983-84, total contributions have grown 59.4 percent, three times faster than inflation (up 19.1 percent since 1983) and slightly more than twice as fast as the Higher Education Price Index (which measures the cost of goods and services colleges must buy and has risen 27.2 percent since 1983).

The surge last year in total contributions was grounded in the substantial recovery of individual giving (especially individual giving for capital purposes to private institutions). Alumni donations were up 12.2 percent in 1989 (accounting for almost 26 percent of the year's total support), and nonalumni donations were up by 7.8 percent. Together, alumni and nonalumni individuals (the source of nearly half of all voluntary support) gave 10.1 percent more than they had in 1987-88. Alumni giving, at $2.3 billion, is almost back to its 1986-87 high (which reflected two consecutive years of extraordinary 25 percent growth) and shows a 75 percent increase over five years. Nonalumni giving, at $2.1 billion, is slightly higher than in 1986-87, and up 57.8 percent since 1983-84.

Growth in Voluntary Support of Colleges and Universities, 1968-69 to 1988-89
(billions of dollars)



Also contributing to the overall rise, corporations (the third-ranking donor category) increased their support of higher education by 5.1 percent in 1989, bettering the previous year's sluggish 1.9 percent increase — and this despite a continued mixed corporate profit picture. The 1989 corporate total, $1.95 billion (or about 22 percent of voluntary support from all sources), establishes a new benchmark for corporate giving and is up 53 percent since 1984 — an average annual growth rate of 10.6 percent.

Foundation giving, the only category in 1987-88 to increase even marginally faster than the cost of living, showed substantial growth in 1989 as well. At $1.74 billion, it is up 8.4 percent and constitutes almost 20 percent of private contributions to higher education — a share that has been growing now for two years after several years of decline.

Donations from religious organizations rose by a striking 20 percent after two years of decline, and giving by "other" groups (clubs, unions, fund-raising consortia, etc.) went up 10 percent. Together these donor categories account for almost 10 percent of total voluntary support.

Not surprisingly, since contributions for capital purposes are frequently made in the form of appreciated property (stocks and securities), the share of private support designated for capital purposes accounted for most of the decline of individual giving in 1988 and for its recovery in 1989. Capital support was up $350 million, or 9.8 percent, in 1989. Giving for current operations was also up, by 8.1 percent.

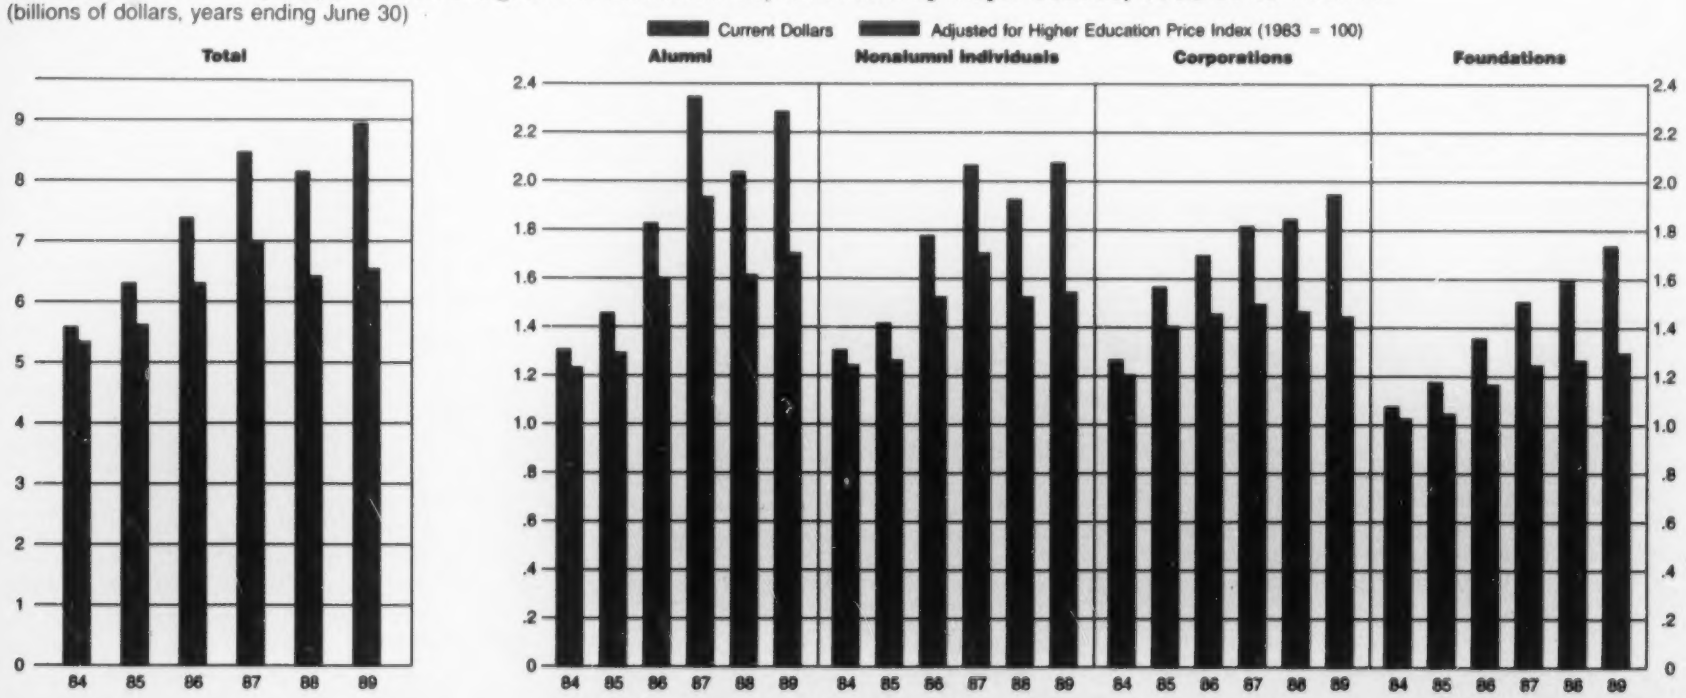
Expenditures and Voluntary Support

The 8.8 percent increase in voluntary support for 1989 translates into a 6.5 percent increase in support per student, now averaging $684 per year (see **Table 2**). Adjusted for inflation, the increase in per-student support amounts to 1.8 percent and the average annual figure (in 1983 dollars), to $554. Support per student in current dollars has risen steadily since 1950; adjusted for inflation, however, per-student support reached a peak in the late 1960s, dropped sharply in the early 1970s, and has since recovered just half that decline. In fact, although voluntary support in absolute terms is up 21 percent since 1985-86, private contributions now cover a slightly smaller share of current-dollar institutional

Estimated Voluntary Support of Colleges and Universities, Total and by Major Source, 1983-84 to 1988-89
(billions of dollars, years ending June 30)



expenditures (6.8 percent) than they did in the 1986 academic year (6.9 percent).

Total expenditures of colleges and universities, including both capital and operating outlays, are estimated to have been $131.4 billion in 1988-89, an increase of 6.2 percent over the previous year and one of the smallest year-to-year increases since 1950. Moreover, while the increase was slightly greater than the CPI in 1988-89, it was smaller than the combined effect of enrollment growth and inflation; so expenditures per student, adjusted for inflation, showed a decline of 0.6 percent.

Future Trends

Looking ahead to the next few years, voluntary support of higher education should show moderate growth in constant dollar terms (provided there is no severe, broad-based economic downturn). With the projected weaker economic conditions and increased competition for the voluntary support dollar from other sectors of the non-profit community, a return to the double-digit increases of the early 1980s is not likely.

What does appear likely and deserving of continued attention is the increasing competition among different types of educational institutions (public and private, research/doctoral, comprehensive, and others) for support from the different categories of donors (individuals, corporations, foundations, and the rest). Educational institutions will define their missions more precisely and sharpen the focus of their appeals. Donors will likewise clarify their missions and focus their support. As a result, the shares of support that various types of institutions receive from various donor categories will probably change. The Council will be charting these developments and reporting on them extensively in future editions of *Voluntary Support of Education*.

The 1988-89 Survey

The national estimates set forth on the preceding pages are projected from responses to the annual survey of voluntary support of education conducted by the Council for Aid to Education.* In 1989, usable survey responses were received from 1,132 institutions, which reported voluntary support of $7.5 billion (see **Table 3**). Experience, bolstered by a follow-up study of nonrespondents in 1989, indicates that each year's survey participants account for about 85 percent of the voluntary support raised by all colleges and universities.

The rate of participation in the 1988-89 survey, roughly 33 percent of the college and university population, was about the same as it has been for many years. Among the various categories of educational institutions, however, there are marked differences in participation rates and the relative importance of amounts reported (see page 14). As in last year's report, we have used the classification system developed by the Carnegie Foundation for the Advancement of Teaching, combining its ten college classifications into four categories (see glossary on page 15).

* Based on these and other Council surveys, we have prepared graphic presentations of 30-year trends in voluntary support of education and created an electronic database that spans 20 years. Contact the Council for additional information.

Who Received Support

Table 3 shows, by Carnegie classification, the number of reporting institutions, total voluntary support, and average voluntary support per institution for both 1987-88 and 1988-89 on a consistent basis, together with year-to-year percentage changes in voluntary support. The general outline of these data is the same as it has been for many years: The four-year colleges and universities account for the lion's share (about 99 percent) of total reported support, and the private institutions account for two thirds of the

support reported by all four-year colleges. The 182 institutions classified as "Research/Doctoral" raised two thirds of the funds reported by all 1,132 participants.

Among respondents to the Council's survey, private colleges and universities reported receiving $4.88 billion in voluntary support, while publics reported gifts totaling $2.67 billion. The average support per institution, for private colleges and universities, went up 7.4 percent from 1987-88 (to $6.67 million), a reflection of the recovery in individual giving (always the largest donor category in this sector). The average support per institution for public colleges and universities (where corporations are the largest donor category, nonalumni individuals come next, and alumni are third) rose 9.4 percent, to $6.66 million. This is consistent with the general pattern of change over the past two decades: Voluntary support has grown faster at public institutions during the last 20 years than it has at private colleges and universities.

With respect to institutional categories, the 74 private research/doctoral institutions participating in the 1989 survey reported the highest voluntary support total — $2.7 billion, or an average of $36.4 million per institution **(Table 3)**. The next highest recipients of voluntary support were the public research/doctoral institutions, reporting $2.2 billion, for an average of $20.8 million per university. Private liberal arts institutions, as a group, received $1.1 billion ($3.5 million on average per college). These three institutional groups, making up 45 percent of the 1,132 survey respondents, accounted for 80 percent of the total voluntary support dollars. The range in average support per institution for comprehensive and specialized institutions ranged from a high of $8.5 million for the public specialized schools to $1.6 million for the public comprehensives. The public liberal arts colleges raised just under $1 million dollars on average per institution (down from last year, but only seven such colleges participated in the 1989 survey, as opposed to twelve in 1988). These patterns are similar to those for previous years.

Just 10.5 percent of 1,367 two-year colleges nationwide responded to the survey; 25 were private junior colleges and 119 were public community colleges. This represents a net decrease of six institutions from 1987-88. The two-year colleges reported voluntary contributions of $73.7 million, with the private institutions raising $29.2 million, or $1.2 million per institution, and public community colleges raising $44.5 million, or $374,000 per institution.

Patterns of Change

Since the number of survey respondents varies from year to year, two types of analysis are necessary to show changes. Using an average per institution corrects for different numbers of respondents in each year, but it does not correct for changes in the composition of the sample. And selecting institutions that participated in both the 1988-89 and the 1987-88 surveys — a "core" group, which includes 87 percent of all respondents — shows actual year-to-year variations for a consistent, but smaller, subset of the sample. **Table 3** presents changes in support by type of institution using both methods.

Average support per institution, $6.7 million, was up by 8.1 percent. Twenty years ago, the average was $1.3 million. By classification, all but the public liberal arts colleges and the public community colleges posted gains — ranging from a modest 1.8 percent increase for private research/doctorals, to a 48.2 percent increase for

private junior colleges (although too few such colleges participate regularly in the survey to serve as the basis for conclusions about trends).

The 980 core institutions raised $7.3 billion in total support, up 7.6 percent from the prior year. All categories of core institutions but public specialized and public community colleges raised more than last year, with increases ranging from 5.3 percent for the core private research/doctorals to 26.5 percent for core private specialized institutions.

Who Contributed Support

Contributions from alumni and nonalumni individuals rose across the board in 1988-89. Alumni constituted the largest single donor group for the fourth consecutive survey, 25.7 percent of the total, as shown in **Table 4**. For the 980 core institutions (see **Appendix Table B**), alumni gifts rose by 16.2 percent for the private institutions, 0.3 percent for the publics, and 11.8 percent overall.

Donations from nonalumni individuals — faculty, trustees, parents, and other friends — comprised 23.3 percent of total giving, second after alumni. For both the private and the public institutions, the core sample also shows healthy increases in nonalumni giving — private institutions up 6.4 percent, publics up 5.9 percent, and a 6.3 percent increase overall.

More than two thirds of the total contributions from nonalumni individual donors go to the private-sector colleges and universities. Together, alumni and nonalumni individuals account for 55 percent of the support received by private institutions, and just 38 percent of the support for public institutions.

Corporate contributions accounted for almost 22 percent of the support received by all participants in the 1988-89 survey, down slightly from last year when the overall scope of support was so reduced by the decline in individual giving. Corporate grants to the core group of institutions increased by 5.4 percent in 1988-89 (after a meager 0.6 percent increase last year, and an 8 percent increase in 1986-87). Every category of private institution except the liberal arts colleges (and, by a fraction, the private research/doctoral institutions) received more corporate support in 1988-89 than in 1987-88 (for an overall 0.4 percent increase in corporate support of private institutions). But the increases in corporate support of public institutions were consistently more striking: Among our core group, public research/doctoral institutions received 11.1 percent more than last year; public comprehensives got 14.5 percent more; public liberal arts colleges (a very small number, to be sure) reported 32.6 percent more corporate donations; and public specialized institutions (again, very few participants belong to this category) showed 31.6 percent more corporate contributions. The total increase in giving to public four-year institutions was 12 percent.

The share of all corporate contributions going to private institutions as a group has been shrinking steadily over the past 15 years, and for the second year in a row, corporate giving to public institutions actually exceeded contributions to private institutions among respondents to the Council's survey: Of the 1,132 participating institutions (**Table 6**), public colleges and universities received 52 percent of the corporate dollars, with the remaining 48 percent going to

(Figures in parentheses show percent of total in each column.)

private institutions. (Private colleges and universities still do receive the largest share of total voluntary support, but most of it comes from individuals.)

As usual, four-year colleges and universities received the lion's share, 99 percent, of corporate support among 1989 survey respondents. Support for two-year institutions as a group declined, though the 42 percent drop in corporate support of the core public two-year institutions is attributable to the inclusion in 1987-88 of a special $8.6 million gift of corporate property to one community college. Public community colleges still net a much larger share of corporate support than do private two-year institutions.

Among both private and public institutions participating in the 1988-89 survey, research/doctoral universities attracted the majority of corporate support — 68 percent of corporate contributions in the case of core private research institutions, 84 percent for the core publics. That is an average of $7.2 million for each private research/doctoral university, and $6.7 million for each public research institution.

Foundation grants accounted for a 19.5 percent share of total support, maintaining last year's increase (to 19.6 percent) from 17.8 the previous year. Two thirds of these grants went to the private institutions, one third to the publics. But among the core group of institutions, foundation support for the publics increased by 11.9 percent, for the privates by a smaller 4.2 percent, and overall by 6.7 percent. The major increases for core private institutions were in grants to the private comprehensive and specialized schools; they enjoyed increases of 22.3 percent and 23 percent respectively. Among the public institutions, foundation grants to the comprehensives increased by 39.3 percent and grants to the public community colleges rose by 47.4 percent.

Table 4a

Percentage Distribution of Donor Support by Type of Institution, 1988-89

	Alumni	Other Individuals	Corporations	Foundations	Religious Organizations
Research/ Doctoral	63.2	56.5	77.3	68.5	21.2
Comprehensive	11.0	16.1	12.0	11.1	22.2
Liberal Arts	23.7	16.6	6.0	12.4	33.0
Specialized	1.8	9.3	3.7	7.1	21.3
Two-Year	0.2	1.5	1.0	0.9	2.3
Total	100.0	100.0	100.0	100.0	100.0

Foundation support of private liberal arts colleges, which had risen by 14.3 percent the previous year, fell in 1989 by 8.1 percent.

A total of $200 million in gift income came from religious organizations in 1988-89. This represents 2.7 percent of total support, up from 2.4 percent the year earlier. Ten years ago religious support made up 5 percent of total gifts. For the core institutions, donations from religious groups rose by 1.6 percent. The largest share of religious support, about 33 percent, goes to liberal arts colleges, all private.

Contributions from other organizations — clubs, unions, fundraising consortia, etc. — accounted for 7.1 percent of total reported gifts, up very slightly from last year's 6.9 percent. The core institutions reported a gain of 8.1 percent in support from other organizations, much of which was received by the private comprehensives, the private liberal arts colleges, and, among the public institutions, by the public research/doctoral institutions.

Special Forms of Giving

Along with the total dollar value of all gifts received from each major donor group, the Council survey also collects data on particular forms of giving and tracks them over time. Included are bequests and deferred gifts from individuals, matching gifts from corporations, and noncash gifts from both businesses and other sources.

Bequests. Proceeds from estate settlements amounted to $787.7 million in 1988-89, a $73 million decrease from the previous year. Bequests accounted for 22.1 percent of individual giving, down from the near-record high of 25.2 percent last year. But the proportion of contributions in the form of bequests varies randomly over time (**Table 5** presents data for the last decade).

Presented in **Appendix Table A** are details on bequests designated for current operations and for capital purposes by type of institution. Private institutions received slightly more than three fourths of all bequest dollars in 1988-89, the research/doctoral institutions leading with $297 million and the liberal arts colleges next with $189 million. About 70 percent of all estate

Table 5

Bequests and Deferred Gifts, 1978-79 to 1988-89 (000 omitted)

Year	All Individual Gifts	Bequests		Deferred Gifts	
1978-79	$1,202,496	$296,993	(24.7)	$ 95,946	(8.0)
1979-80	1,403,538	320,825	(22.9)	99,293	(7.1)
1980-81	1,611,232	374,054	(23.2)	103,153	(6.4)
1981-82	1,968,408	529,119	(26.9)	125,632	(6.4)
1982-83	2,054,133	437,961	(21.3)	154,508	(7.5)
1983-84	2,184,020	512,960	(23.5)	83,169	(3.8)
1984-85	2,411,244	485,000	(20.1)	194,028	(8.0)
1985-86	3,074,469	714,082	(23.2)	244,583	(8.0)
1986-87	3,795,699	756,795	(19.9)	425,297	(11.2)
1987-88	3,409,517	860,398	(25.2)	261,621	(7.7)
1988-89	3,570,299	787,750	(22.1)	387,272	(10.8)

(Figures in parentheses show percent of all individual gifts.)

settlements were designated for capital purposes, down slightly from 71 percent the previous year, and 75 percent in 1986-87.

Deferred Gifts. After falling in 1987-88 from the previous year's unusual high point, these "planned gifts" — such as charitable remainder trusts, pooled income funds, and gift annuities — rose again in 1988-89. A total of $387.3 million was reported, up $125.7 million or 48 percent from 1987-88. This amount represents 10.8 percent of the total support received from individuals, a share almost as large as the 1986-87 record of 11.2 percent. **Table 5** tracks deferred gifts over time, and **Appendix Table A** presents details by type of institution. Just over three quarters of these gifts went to the private institutions, most of them to private research/doctoral universities.

Matching Gifts. The share of corporate support received from businesses through employee matching-gift programs rose slightly in 1988-89, from 8.1 percent of corporate support in the 1988 academic year to 8.8 percent in 1989, and the average match per institution rose from $271 to $279 — increases that are naturally tied to the 1989 recovery in individual giving (gifts from individual employees trigger corporate matching gifts). After rising at an extraordinary average annual rate of 21 percent from 1976-77 to 1986-87, matching gifts are now growing at a slightly slower but still notable average annual rate of 18.5 percent (from 1978-79 to 1988-89). Colleges and universities reported receiving $138.4 million in matching gifts in 1988-89; when the Council first began tracking these data in 1966-67, matching amounted to $4.2 million, just a 2 percent share of all corporate giving. This year, fourteen private and seven public institutions reported receiving more than $1 million each in matching gifts.

As shown in **Table 6**, matching-gift monies are particularly important to the private liberal arts institutions, accounting for 33.4 percent of corporate grants in 1988-89. And overall, corporate matching is more important to private institutions than to publics (a finding in line with the generally greater importance of support from individuals for private institutions).

Noncash Corporate Gifts. Colleges and universities reported lower levels of in-kind business contributions in 1988-89 than in the previous year. These gifts, which take the form of company products and surplus property and equipment, totaled $256 million, or 16 percent of the the total corporate support reported by participants (down from 18 percent in 1987-88). The vast majority of products and property goes to four-year institutions; in the 1987-88 survey, gifts of products had been quite evenly divided between public and private four-year institutions, but last year, as in several other dimensions of voluntary support, the publics outpaced the private institutions in receipts of company products (by about $4.5 million, among four-year institutions). Most gifts of products were directed toward research/doctoral institutions, and this was generally true for gifts of other property as well.

Table 6

Total Corporate Support and Matching Gifts by Type of Institution, 1988-89

** Because many companies match gifts at a ratio of $2 or sometimes $3 for every employee dollar, the average match is estimated to be about half again as much as the employee's gift.*

Gifts of company products were valued at $182.5 million (compared to $181.7 million in 1988), making this the third year in a row that these donations have fallen or remained flat. The private four-year colleges and universities reported a slight decline in gifts of company products, offset by a rise in company gifts to private two-year colleges; the four-year public institutions reported an increase, offset by a decrease in the value of gifts to public community colleges. (Details by type of institution can be found in **Appendix Table A**.)

Corporate property gifts — usually large, nonrecurring contributions of land, buildings, and equipment — dropped by over $30 million to $73.1 million, falling from 7 percent of total corporate support in 1988 to about 4.4 percent of total corporate support in 1989. The drop was especially pronounced in the category of public institutions, but the 1987-88 total for that category had included an exceptional $8.6 million gift to one public junior college.

Other Property Gifts. These donations come primarily from individuals, and include gifts of land, houses, paintings, antiques, and rare books. In 1988-89 the total reported value of these gifts was $295.5 million, a $92 million increase from the amount reported in the previous year. This is not surprising given the overall recovery of individual giving and may reflect the assimilation of changed tax provisions affecting gifts of appreciated property.

Purposes of Support

Table 7 shows voluntary support by purpose for colleges and universities participating in the 1988-89 survey, with comparative data for the previous year. Support for capital purposes -- buildings, equipment, and endowment — which is often received in the form of securities, recovered this year along with other forms of individual giving, recouping much of last year's average per-institution drop of $350,000 (compared to the previous year) with a $250,000 gain per institution, an average increase of 9.2 percent. Support for current operations, up last year by about $250,000 per institution, rose again in 1989 by about the same amount, for an average increase of 7.3 percent — showing less rapid growth than support for capital purposes (which surged mid-decade in response to the large capital fund-raising campaigns under way at many institutions), but maintaining a larger share (56.5 percent) of the total dollar figure.

The 1988-89 increases were felt most strongly in the private institutions, where capital donations rose almost across the board for all core survey participants; specialized private institutions in the core group reported nearly a 30 percent increase in support for property, building, and equipment, a 96.5 percent increase in unrestricted endowment income, and a 31.6 percent increase in restricted endowment income.

The core public institutions actually reported a net decline in capital contributions, though public comprehensives posted increases in all forms of capital support (see **Appendix Table B**).

Historically, the private institutions have received a far greater proportion of their gift income as capital support, while the publicly controlled schools have tended to receive a greater share for current operations. In 1988-89, 49 percent of all funds raised by the private institutions were earmarked for capital purposes, up from 47 percent in 1987-88. For the publics, capital support made up only 36 percent of total contributions, down slightly from last year's 37 percent.

As was the case in the 1988 academic year, about 64 percent of all capital support in 1989 was designated for the institutions' endowment funds; of that, about 86 percent was restricted by the donors as to the uses of the endowment income. These proportions were similar for both private and public institutions.

Examining the purposes of grants by specific donor groups reveals that individuals earmarked 44 percent of their contributions for current operations; corporations and foundations — which generally avoid capital gifts — gave 68 percent and 62 percent respectively. Most of the corporate and foundation grants for current operations were restricted (87 percent of them), with research receiving the lion's share. On the capital side, 72 percent of the gifts from individuals were directed to the institutions' endowments. Three fifths (60 percent) of the capital funds from corporations and half of those from foundations were earmarked for property, building, and equipment .

More and more, donors are restricting the uses to which their gifts are put. In 1988-89, 76 percent of the gifts to private institutions were designated for specific purposes; for the public institutions it was significantly higher — 91 percent.

Colleges were asked to provide details about the use of restricted gifts for both current operations and endowment. **Table 8** presents the results for those institutions that could supply these details. The amounts reported represent 85 percent of all gifts restricted for current operations and 77 percent of the funds restricted for endowment. The distribution is comparable for private and public institutions, and roughly similar to the 1987-88 survey.

Research received the largest amount — $1.08 billion — for a 26.3 percent share of the total restricted funds reported ($4.1 billion). More than 91 percent of these research funds went for current operations rather than to endowment. Donors designated 16.2 percent of their restricted contributions for student financial aid, and more than half (55 percent) of these dollars went into the institutions' endowments. Contributions for academic divisions — schools and departments — made up 17.5 percent of the total, down slightly from 1987-88. Faculty and staff compensation received 6.6 percent of the total, also down slightly from last year. Libraries, public service, and extension activities, and physical plant each received less than 2.5 percent of total restricted support.

Table 8

Support with Restrictions on its Use for Current Operations and for Endowment for Institutions Reporting these Data, 1988-89 (000 omitted)

(Figures in parentheses show percent of total in each column; details do not always add up to totals because of rounding.)

Size of Gifts

Most participating institutions provided details about gifts under or over $5,000 from individuals for current operations. **Table 9** shows the totals, by type of institution. The dollar amounts represent 80 percent of total support from individuals for current operations as reported by all survey respondents.

Gifts under $5,000 provided larger total amounts than did gifts of $5,000 and over for all institutional types save for the private research/doctoral universities. Although gifts of $5,000 and over constituted but a fraction of the number of gifts (0.5 percent), they accounted for 44.3 percent of all the monies received — comparable to their 1988 share of the total. The research/doctoral universities secured about two thirds of all the funds generated by gifts over $5,000.

Data from those institutions that provided complete answers suggest that for gifts of less than $5,000 the average was $135 for the private colleges and universities and $96 for the publics. For gifts over $5,000, the average gift to private institutions was $20,245, and to the publics, $19,982.

Alumni Giving

To facilitate analysis of alumni fundraising, colleges and universities report additional data on the number of alumni of record, the number actually solicited, and the number making a gift. These data are used to calculate the number of donors relative to the number actually asked for support — the "solicitation effectiveness rate" — and average alumni gift size (see **Table 10**).

Of 21.7 million alumni solicited by the colleges and universities reporting these data for 1988-89, 4.9 million, or 22.7 percent, made a gift. In 1987-88, roughly the same number of alumni were solicited with 5.0 million, or 22.9 percent, making a donation. **Appendix Table A** provides details by type of institution.

Most types of colleges and universities reported fewer alumni donors in 1989 than in 1988 — but most institutional categories also had fewer participants in the survey in 1989. The only colleges and universities that reported more alumni donors in 1989 were private and public comprehensive institutions and private specialized institutions. Solicitation effectiveness rates were generally down by a fraction, the only exception being public community colleges. As usual, the private liberal arts colleges reported the highest effectiveness rate, 33.3 percent; though improved, the solicitation effectiveness rate of the public community colleges remains lowest, at 10.1 percent. For all private institutions, the solicitation-effectiveness rate was 28.1 percent compared to 17.8 percent for the publics; these are comparable to the rates reported last year and the year before.

The average size of alumni gifts to public four-year institutions fell slightly in 1988-89, but this was due largely to a drop in the size of gifts to public liberal arts institutions — and the data for this class are skewed by the small number of institutions reporting and the presence in 1988 of one such institution that reported a gift average of about $1,000. The average size of alumni gifts to public community colleges also fell, however, so the net effect was a small drop in the size of alumni gifts to public institutions. Average size of gift to private institutions rose by $50 to $458 (more than twice the size of alumni gifts to the publics) and overall, the average alumni gift was up from $327 to $354.

Alumni giving for ongoing operations — typically to the annual fund — was also up in 1988-89. Data on this form of giving are presented in **Table 10a**. Almost all institutions reported more gifts, and the average contribution rose to $164 from $150 the previous year. Average gift size ranged from a high of $250 for the current operations of private doctoral institutions to a low of $32 for the public liberal arts colleges (but only seven such institutions provided this information).

Technical Notes

The **Voluntary Support of Education** survey is designed to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds as well as support received from federal, state, and local governments and their agencies.

The 1988-89 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1988 and ending June 30, 1989. Questionnaires were mailed to roughly 2,800 colleges and universities and 1,000 independent elementary and secondary schools. College and university participation, at 1,132 or about 40 percent, was very slightly below the 1987-88 level of 40.8 percent, with four fewer four-year and six fewer two-year participants. The number of elementary and secondary schools participating, at 521 or 52 percent, fell short of last year's all-time high response rate.

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,100 and 1,200 colleges and universities out of nearly 2,800 invited to participate. Despite yearly changes in both size and composition of the group of institutions taking part in the survey, the Council estimates that the amounts reported

have averaged about 85 percent of the total voluntary support received by all colleges and universities (an estimate confirmed in 1989 by a follow-up survey).

Survey participation varies greatly by type and control of institution. The composition of the 1988-89 sample is shown below.

Type and Control	Total Number*	Number Responding	Response Rate (%)
Research/Doctoral	213	182	**85.4**
Private	79	74	**93.7**

More details on the participation record for 1988-89 are provided in the adjacent listing of institutions whose survey forms arrived too late for tabulation and institutions that were unable to supply details. In addition, five two-year colleges reported receiving no private support during the fiscal year.

Details of Support by Participating Institutions

Definitions of Classifications

Colleges and Universities

Research/Doctoral Institutions: Carnegie identifies four categories of universities ("Research I and II," "Doctorate-Granting I and II"), classified by the amounts of federal research support received and numbers of Ph.D. degrees awarded each year. The four are combined for the purposes of the survey.

Research/Doctoral Institutions — Public 16
Research/Doctoral Institutions — Private 20

Comprehensive Institutions: There are two Carnegie categories of these colleges and universities offering bachelor's degrees (half in professional or occupational disciplines) and usually master's degrees as well. Category I enrolls more than 2,500 students; II between 1,500 and 2,500.

Comprehensive Institutions — Public 22
Comprehensive Institutions — Private 28

Liberal Arts Institutions: Two categories of primarily undergraduate colleges (one more selective than the other) that award more than half of their bachelor's degrees in arts and science fields.

Liberal Arts Institutions — Public 34
Liberal Arts Institutions — Private 34

Professional and Specialized Institutions: These are baccalaureate and postbaccalaureate institutions with programmatic emphasis in a single specialized field such as business, theology, engineering, law, medicine, art.

Professional and Specialized Institutions — Public 46
Professional and Specialized Institutions — Private 46

Two-Year Institutions: These community, junior and technical colleges offer certificate and degree programs through the Associate of Arts level and with few exceptions do not offer the baccalaureate degree.

Two-Year Institutions — Public 50
Two-Year Institutions — Private 54

Independent Schools

Boarding schools: Schools enrolling 95 percent or more boarding students.

Independent Elementary and Secondary Schools 58

Boarding/day schools: Schools enrolling between 50 and 94 percent boarding students, with the balance day students.

Day schools: Schools enrolling 95 percent or more day students.

Elementary schools: Schools with students in any grade PS-9, but none in grades 10-PG (*e.g.*, PS-6, K-9, 6-9)

Secondary schools: Schools with students in any grades 10-PG, but none in grades PS-6 (*e.g.*, 7-12, 9-12, 7-PG)

Elementary/secondary schools: Schools with students in any grades PS-6 *and* any grades 10-PG (*e.g.*, K-12, 5-12, 1-10)

Technical Notes:

A. In the listing on the following pages, "Educational and General Expenditures" does not show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: 1) some multicampus institutions are shown in summary as well as in detail; and 2) some of the component professional schools of major institutions are also listed separately.

Independent Elementary and Secondary Schools

Survey Results

The 521 private independent schools responding to the 1988-89 survey reported $457.6 million in voluntary support; of those respondents, 516 (reporting $448.7 in voluntary support) provided complete information about sources and purposes of gift dollars received.

Comparisons with 1987-88 are complicated by the inclusion in last year's figures of two very large bequests from the estate of George Woodruff to two schools (totalling $32 million). Compared to last year's inflated average support per school, the 1988-89 average per school rose only 0.7 percent, from $863,461 in the earlier year (546 schools reporting) to $869,580 in 1989 (see **Table 12**). But if the $32 million is excluded from these calculations, the per-school average shows an 8 percent increase over 1988.

Who Received Support

A breakdown of support by category of school according to the level of program and type of student body is shown in **Table 11**. Day elementary schools received the smallest amount of support; the boarding and boarding/day schools secured the most. Coeducational schools raised more money than boys' or girls' schools, but the boys' schools had the highest average per school — $1,344,785 compared with $819,983 for the girls' schools and $819,820 for the coed schools. The average per-institution support for girls' schools has increased since 1987-88 (when it ranked third, at $722,761), but in all other respects, these patterns are familiar from previous years' survey results.

Since the number of survey participants varies from year to year, two types of analysis are necessary to show changes over time. Using an average per institution, as above, corrects for different numbers of respondents each year. And

selecting those institutions participating in both the 1987-88 and 1988-89 surveys — a "core" group — shows actual year-to-year changes. **Table 12** uses the core group of 412 schools to analyze changes in support by source (see **Appendix Table D** for details by type of school and purpose of support).

Sources of Support

Gifts from alumni and parents recovered somewhat from their declines in 1987-88. After falling 15.3 percent the previous year, average per-school alumni support was up 13.8 percent in 1989. Per-school support from parents rose less dramatically, by 2.7 percent (after a decline of 15.4 percent in 1988). These two categories of individuals provided nearly two thirds (64.2 percent) of total reported support, with alumni alone accounting for 36.4 percent.

Contributions from other individuals appear to have fallen markedly, but this is the donor category to which last year's exceptional Woodruff bequests were credited. If the $32 million is excluded from the "other individuals" category in 1987-88, the average support per institution from that source drops significantly, and this year's average of $112,783 actually represents a 12 percent increase.

Foundation grants, the only donor source that grew substantially in 1988 (by 14.4 percent), fell in 1989 by 11.9 percent (comparing averages per institution); among the core group, foundation grants fell by 10.6 percent. The foundation share of total support returned to a more typical 12.8 percent, from almost 15 percent in 1988.

Gifts from corporations, down in 1988, were up by a healthy 29.2 percent among the core institutions, and the average corporate support per institution rose 22.5 percent in 1989. Corporate contributions comprised 4.7 percent of total support, up from 3.9 percent the previous year and just above the 4.6 percent share reported in 1986-87.

Donations from religious organizations were up by all measures. Average support per institution rose 36.9 percent, support for the core group rose 11 percent, and religious organizations accounted for a larger share of total support (1.9 percent in 1989 as compared to 1.4 percent in 1988 and less than 1 percent the previous year).

Finally, contributions from other organizations — clubs, special fundraising events, etc. — also rose according to all measures. Up by 66.5 percent to the core group, gifts from this donor category accounted for 3.4 percent of total support (as opposed to 2.2 percent in 1988) and averaged 55 percent higher per institution than in 1988.

Special Forms of Giving

Proceeds from bequests and deferred gifts (such as trusts, pooled income funds, and annuities) were off sharply compared to 1988, but the apparent drop of about $25 million is largely attributable to last year's inclusion of the two special bequests totaling $32 million. Bequest income for current operations, unaffected by that, was actually up in 1989, as was the average per-school bequest income for capital purposes, when measured against an uninflated 1988 average. Income from deferred gifts totaled $12 million, up substantially from the 1988 total of $9.6 million (see **Appendix Table D**).

Matching gifts to private independent schools accounted for 35.3 percent of the total $21.2 million in corporate support. That's down from a 42.3 percent share in 1988 (the decline reflects increased direct corporate giving to schools) and about even with the previous year's 35 percent. They totaled $7.5 million, down slightly from the $7.7 million reported by more schools in 1988, but the average match was up slightly, from $384 in 1988, to $393. The average match in both 1987 and 1986 had been $395.

Gifts of company products and other property rose as part of the overall rise in corporate giving to independent schools. Product gifts amounted to $657,000 (up from the $569,000 reported by a larger number of schools last year) and other in-kind corporate gifts amounted to $889,000 (up dramatically from $185,000 in 1988). Together, product and property gifts also comprised a larger share of total corporate giving than they had in 1988 — 7.2 percent as compared to 4 percent. In 1987, however, in-kind gifts had stood at 9 percent of total corporate support.

Property gifts from noncorporate sources (which includes real and personal property such as land, houses, paintings, antiques, and rare books) declined from $6.7 million in 1988 to $5.3 million in 1989.

Alumni Giving

Data on alumni giving for all purposes and for current operations by type of school are in **Appendix Table D**. Overall solicitation effectiveness was up slightly in 1989 — 31.5 percent of the alumni asked to give, gave, as compared to 30 percent for the previous two years. Among the types of schools, the boarding and boarding/day schools were most effective at alumni solicitation, reporting donations from 36.3 percent of alumni contacted. Day elementary schools had the lowest solicitation effectiveness rate, at 15 percent; all other types of schools reported rates around 30 percent. The average alumni gift rose to $450 from $405 in 1988, another reflection of the recovery in alumni giving noted above. For current operations, solicitation effectiveness was 30 percent, up slightly from 29 percent in 1987-88 but down from 38.6 percent the previous year. For the core group of schools, the rate of annual giving for current operations has remained fairly constant over the past few years, at around 30 percent. The average gift for current operations was $191, up from $174 in 1988.

Purposes of Support

Table 13 looks at changes between 1987-88 and 1988-89 in the purposes of gifts as specified by donors. Contributions for current operations rose (as they have for the past few years) by 14.3 percent among the core group of independent schools. Donations for capital purposes — building, equipment, endowment, and loan funds — appear to be down by 5.2 percent when comparing averages per institution, and by 7.5 percent for the core group. But again, the data for 1987-88 are inflated by inclusion of the Woodruff bequests in the restricted endowment category; if the 1988/1989 comparison is recalculated without the $32 million, 1989 shows a 6.4 percent increase in average support per institution for capital purposes, and a 5.6 percent increase in capital support for core schools.

Support for current operations in 1989 accounted for a 41.7 percent share of total support, and support for capital purposes accounted for the remaining 58.3 percent. Traditionally, the share of support designated for current operations falls between 35 and 40 percent.

Just over half (53 percent) the capital support was earmarked for the schools' endowments; of that, about two thirds (the same share as last year) was restricted by the donors as to the uses of the endowment income. Compared to last year, unrestricted funds for both current operations and endowment were up.

Table 14 examines the purposes designated by specific donor groups. Individuals and foundations directed a larger share of their support to capital needs, as they had done the previous year, and corporations favored capital purposes by a small margin as well (last year they had divided their support evenly). Religious organizations gave more for current expenses, as they had in 1988, and other organizations divided their contributions quite evenly (last year other organizations had favored current operations heavily).

The lion's share of individual gifts for current operations (87 percent) were unrestricted; just under three fifths (59 percent) of the gifts from organizations for current operations were unrestricted. Foundations were the only donor group to designate more of their operational support (57 percent) for restricted than for unrestricted purposes. Almost precisely the same pattern prevailed in 1988.

Individuals designated just under three fifths of their capital support for the schools' endowments; foundations divided their capital support fairly evenly between endowment and property, buildings, and equipment. Corporations, religious organizations, and other organizations all gave more capital funds for property, buildings, and equipment.

Supplementary Data

To facilitate studies of fundraising effectiveness, schools were asked for additional information on enrollment, endowment, total educational expenditures, and advancement-program expenses. **Table 15** presents advancement-program expenses as a percentage of school expenditures and of total voluntary support by type of school. For all schools reporting these data, fundraising expenses were 4.0 percent of school expenditures and 17.5 percent of total giving in 1988-89, both shares up slightly since 1987-88.

Data on total endowment and endowment per student by type of school are shown in **Table 16**.

Table 15

Advancement-Program Expenditures as Percentage of School Expenditures and Total Voluntary Support, 1988-89
